* Dismissals that are not credited to the bowler but which result from the ordinary course of play will only show a dot in the bowler's analysis, unless runs or sundries were **completed** prior to the dismissal, in which case the runs or sundries are recorded.

Dismissals that happen 'between balls', such as retirements and timed out, are not recorded in the bowler's analysis at all.

NB The former dismissal type of handled ball is now incorporated with obstructing the field.
